EXAMINER'S ACTION

-----  
1. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-32, drawn to data collection systems, methods and components, classified in Class 364, subclass 200.

II. Claim 33-36, drawn to methods of processing control signals, and controlling equipment, classified in Class 380, subclass 20.

3. The inventions are distinct, each from the other because of the following reasons:

There appears to be no nexus between the categories of inventions, as neither group requires the particulars of the other group, nor do they address related fields of the art.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner David Cain whose telephone number is (703) 308-0463. Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0766.
